Peter,

I have attached the photos submitted to me for review of the site AND the comment below from Jason Brown concerning the inspection AND the name of Stan Anderson with the BLM who allowed the stockpile. Please call me when you determine final status.

We appreciate your efforts in this regard.

Cynthia Nielsen

Cynthia

On 12 February 2013, I met with Wayne Olsen (Contractor-PCI), Joe Manning (BLM) and Wayne Wetzel (BLM) to conduct a final review of the quarry site. It was determined at that time that reclamation was acceptable other than where the county has a temporary stockpile of Road Base at the northwest end of the site (see photo 1). There was discussion of the southeast section of the quarry regarding the steepness of the slope (see photo 3), but we didn't want to disturb additional ground back to the east just to reclaim that area. Joe pointed out that some of the existing ground in the area is as steep or steeper and that it would be monitored to see if the seed would take in the rockiest area, but that there are large areas of existing exposed rock. As far as the comments regarding a "catch basin", there is an area which we reviewed that is lower than the access road, but that didn't seem to alarm Joe. As far as seeding goes, the contractor seeded the entire site twice. I understood from our meeting that the BLM was satisfied with the reclamation of the quarry site. Let me know if you have any questions.

**Cc:** Jason Brown

**Subject:** Roadbase stockpile on BLM

Stan Anderson with the BLM allowed the roadbase stockpile to remain in the Bull Claim Quarry area near the access road.

Hi Cynthia,

I've been on the phone with Joe this morning, and we agreed that retaining \$7,000 would be adequate for our need to bond for revegetation. So it sounds like BLM is going to send us a letter concurring on the release of all of the bond but the \$7,000, which will be held until revegetation requirements are met.

FYI, the release of the bond is probably 3 or 4 weeks out, since we need the letter from BLM, and since it takes a while for us to get a check back from the State Treasury. Sometimes it is quicker than that, but a month is probably realistic.
